WIND STUDY

Question 9 - Circuits and Current Pt 2

October 21, 2024 – Wind Study | Question 9

This week's Wind Study has a challenge you won't be able to resist! Click the link to test your circuit smarts with **this week's questions** and see if you've got the power to solve it before Friday!...

October 18, 2024 – Science Shorts | Deformation

Under stress but handling it like a pro? So are the materials we're testing! Our latest Science Short shows how strain impacts materials when the pressure is on, and how deformation changes their structure. Follow along with One Energy Analyst Will to see if they snap back or stretch beyond their limits!...

October 11, 2024 – 'Amazon, Microsoft skirt AEP to file adjustments with PUCO for data center tariff,' – Columbus Business First

One Energy CEO, Jerome Kent, was quoted in Columbus Business First about the ongoing efforts to address AEP Ohio's proposed data center tariff. You can read the full article with a subscription **here**.

October 11, 2024 – 'Big Tech proposes power-rate terms in Ohio data-center fight,' – Reuters

One Energy is a key player in an Ohio regulatory battle that could set a national precedent for managing the growing energy demands of data centers. Check out coverage from Reuters **here**.

October 09, 2024 – Wind View | Powering the Future

This week's Wind View is giving a new take on spin cycles. The two 1.5MW wind turbines pictured here power Whirlpool's dishwasher plant in Findlay, giving the One Energy headquarters a front-row seat to industrial decarbonization.

WIND STUDY

Answer 8 - Circuits and Current Pt 1

October 04, 2024 – Wind Study | Answer 8

This week's Wind Study was all about the flow of electrical currents. Curious to see how you did? Check your answers **here** to stay plugged in! ⚡

October 03, 2024 – Building a Broadcast Desk | A Day in the Life

From blueprint to broadcast, watch as One Energy Corporate Communications Specialist Brittni Capozzi walks us through the creation of our custom broadcast desk in this edition of *A Day in the Life*. Whether we're outside powering industrial facilities or inside creating communication platforms, One Energy is always innovating.
