## COMPANY STATEMENT

**Since 2009, One Energy has earned a reputation as a trusted leader and innovator in the industrial power sector.** From becoming the largest installer of on-site wind projects in the United States to designing and building the first fully digital substation in the country, One Energy has continuously evolved to meet the changing needs of large industrial facilities, leaving a lasting impact on the companies we serve.

**Today, as we continue to grow our services and expand into the public market, we are proud to introduce our new name: One Power Company.** This name change reflects the dynamic company we are – one that is focused on delivering fully integrated, customized industrial power solutions that support the customer-centric power grid of the future.

### **About One Power:**

One Power is an industrial power company that helps large energy users build modern, tailored, on-site power grids for their facilities. In doing so, the company is decarbonizing manufacturing, enabling customer control, and building the customer-centric power grid of the future. As a vertically integrated enterprise, One Power provides physical solutions including *Wind for Industry*<sup>®</sup> and *ManagedHV*<sup>®</sup>, as well as analytics and commercial offerings to enable end users to fully customize their energy experience. Everyday items are being produced cleaner and more sustainably thanks to One Power's *Wind for Industry*<sup>®</sup> projects – from dishwashers, sliced turkey products, and soda cans, to cement and renewable diesel.

Founded in 2009, One Power is the largest installer and owner of behind-the-meter wind energy in the United States. Learn more about the customer-centric power grid of the future at [www.onepower.com](http://www.onepower.com)
