

**JOB TITLE:** ANALYST

## COMPANY DESCRIPTION

Founded in 2009, One Power is an industrial power company that is decarbonizing manufacturing, enabling customer control, and building the customer-centric power grid of the future. The company provides physical solutions including *Wind for Industry*® and ManagedHV®, as well as analytics and commercial offerings to enable end users to fully customize their energy experience. One Power is a Utility 2.0 company and is the largest installer and owner of behind-the-meter wind energy in the United States. Learn more at [www.onepower.com](http://www.onepower.com).

## OVERVIEW

The Analyst is responsible for technical matters relating to the development and financing of *Wind for Industry*® projects. There are two career directions for this position: a finance focus based on financial modeling, and a science focus based on energy production assessments. The focus will be determined by the candidate's background and experience. This position will be within the Project Planning and Technology department, but also has the opportunity to work within other departments within the company.

## ROLES AND RESPONSIBILITIES

- Complete the development of *Wind for Industry*® projects consistent with One Power's published methodologies. This includes feasibility studies, initial turbine siting, zoning, permitting, wind resource assessments, energy production estimates, and land acquisition.
- Communicate technical information and create reports for potential customers, the community, and investors.
- Design, maintain, analyze, and validate on-site data campaigns from One Power's fleet of LiDARs.
- Support business development, meet with customers, and maintain One Power's CRM.
- Build and maintain project and corporate financial models.
- Participate in the research and implementation of new wind resource assessment and project development methods.
- Effectively guide a project through the due diligence process including the creation of deliverables while adhering to an established schedule.

## ORGANIZATIONAL RELATIONSHIPS

This position reports to the Head of Project Planning and Technology. There are no immediate supervisory responsibilities.

## SKILLS AND REQUIREMENTS

- Bachelor's degree in meteorology, engineering, finance, math, economics, or a related field.
- Excellent interpersonal communication skills, technical writing skills, work ethic, and ability to work in an entrepreneurial environment.
- Patience, persistence, and creative problem-solving abilities in groups as well as independently.
- Proficient in Microsoft Excel.
- Finance focus: understanding of financial and business principles, and experience with financial modeling.
- Science focus: significant experience in data analysis; Experience with ArcGIS, wind flow modeling software, numerical weather prediction, and boundary layer meteorology is preferred.
- Experience with 3D modeling software, instrumentation, and computer programming is a plus.
