

Green Campus® Energy Solutions by One Power Company

Building Smarter Campuses with Smarter Power

At One Power Company, our Green Campus® energy solutions power the next generation of industrial and data campuses with built-in renewable infrastructure, streamlined construction, and guaranteed energy performance.

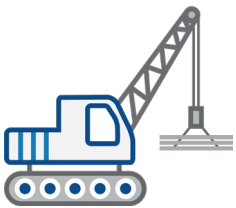

Smart Energy Purchasing with Green Campus® Energy Services

Our Green Campus® energy services provide large-scale customers with predictable, long-term electricity and renewable energy — all at a fixed rate. Whether you're siting a hyperscale data center or a new industrial plant, Green Campus® solutions offer business certainty and environmental performance from day one.

- Lock in fixed pricing for electricity and renewable energy
 - Simplify energy management with bundled delivery and supply
 - Align your ESG and operational goals with a single, integrated provider
-

Turnkey Construction with Green Campus® Infrastructure Services

Our Green Campus® infrastructure services manage every aspect of energy infrastructure construction — from concept to commissioning. One Power's in-house construction teams deliver high-performance, code-compliant structures that are purpose-built for renewable energy generation and grid interconnection.

- Expert construction project management from site prep to energization
- Specialized builds for turbine foundations, substations, and meteorological towers
- Seamless coordination with customer construction schedules and power needs

On-Site Generation with Green Campus® Power Solutions

With Green Campus® power solutions, our customers generate their own clean energy — right on campus. These dedicated energy systems are optimized for reliability, sustainability, and long-term savings.

- Utility-scale generation tailored to your specific load profile
 - On-site wind energy systems engineered for continuous uptime
 - Clean power with full operational transparency and zero-carbon credentials
-

The Green Campus® Difference

Every Green Campus® solution is designed, built, and operated by One Power Company to simplify your energy journey. No middlemen. No surprises. Just a smarter way to build and power a modern campus.
